

GDS entry for a Stretcher Passenger

Amadeus

To indicate a stretcher passenger from an availability, display segment sell, enter:

SS 2 C 3 /ST

SS Segment sell transaction code

2 Number of passengers

C Class of service

3 Line number from availability display

/ST Slash, stretcher passenger action code

System response:

6. SSR STCR BA NN1/S3

For each segment booked using the stretcher action code, the system generates an SSR element for the relevant carrier requesting one stretcher place. Segment association is automatic.

Note: If there is more than one name element in the PNR, you must indicate the passenger needing the stretcher before end of transaction.

Name Element for Stretcher Passengers

You can also enter the stretcher passenger information using the name element when you are creating the PNR. Enter:

NM1BARCLAY/ADAM MR (IDSTCR)

System response:

RP/NCE1A0950/

1.BARCLAY/ADAM MR(IDSTCR)

Sabre

As per Sabre updates from the PNR itself you can identify the stretcher case passenger the entries are mentioned below:

-1BARCLAY/ADAM MR *IDSTR

3STCR(optional segment number)/(optional free text)- (name number)
